SERVICES FOR THE PROFESSIONAL EDUCATION SECTOR

Core syllabus for PEI study programmes

Description

The core syllabus for study programmes at professional education institutions (PEIs) is formulated on the basis of professional competences to be acquired.

The core syllabus for PEI study programmes establishes the professional profile, the field of work, the context, the working processes as well as the professional competences to be acquired by the end of the given study programme. It also describes the key aspects to be covered such as the structure, sequence and duration of training content, admission requirements and the qualification procedure.

Benefits

Careful consideration of the realities of the profession when preparing the core syllabus for PEI study programmes makes it easier to plan training and conduct examinations. The focus on relevant professional competences ensures that training is realistic and that the qualification procedure reflects the actual needs of the profession.

SFIVET services

SFIVET will meet with the sponsor or designated working group to discuss and prepare the key features of the core syllabus for PEI study programmes. During the elaboration process, SFIVET will base itself on the legal requirements established by the State Secretariat for Education, Research and Innovation (SERI). SFIVET will then reach an individual agreement with the client on the various services to be rendered either by SFIVET or by the working group.

Prerequisites

There is a sponsor.
The various professional competences to be acquired have been listed.

Duration

2-4 meetings will be scheduled over a period of 2-4 months. Each meeting will last either a half-day or a full day. It generally takes 4-8 months from the moment the first application is submitted to SERI until the final decision on approval is rendered.

Costs

SERI provides funding to cover a portion of the budgeted costs.
We shall gladly provide you with a quote based on your specific needs.
